SETH PAUL MEDEIROS

React Software Engineer

Medeirosseth@Gmail.com | github.com/Medeirosseth | 225.529.5919 | linkedin.com/in/medeirosseth

Skills

– JavaScript	– React.js/Redux	–Typescript	– Ionic-Framework
–C#	–.NET	– MySQL	– Postman
– RESTful Web Services	– Storybook	– Git	– TDD

EXPERIENCE

Software Engineering Intern | Moica LLC, Portland, OR | August 2021 – Present

- Isolated component development using atomic file methodology in Storybook while converting files to Typescript.
- Perform Functionality, UI, and Regression testing to ensure all features are working exactly as expected.
- Utilized GitHub for reporting bugs and enhancements in a detailed and comprehensive manner.
- Created team specific React process flow in JIRA.

PROJECTS

andChill - Github.com/Medeirosseth/MovieMatcher

JavaScript | jQuery

- AndChill is a web application developed in JavaScript that utilizes the Movie Database API by requesting and parsing JSON to display current movie information (movie poster, title, trailer, and description). User1 chooses either "Yes" or "No" indicating whether or not they would like to watch the shown movie. User2 will be presented with the same list of movies and can indicate whether or not they'd like to watch those movies (presumably with the first user). At any time the second user can press the reveal button to display the list of movies that both users have in common.

McMonster Artist Portfolio Website - McMonsterArt.com

JavaScript | React | Jsx/Scss

- Mcmonster is a portfolio website developed in React that displays the artist's current works. Currently implementing E-commerce by way of Commerce.js

EDUCATION

Epicodus
- Full-stack development utilizing JS/React, C#/.NET, ASP.NET Core MVC, SQL, jQuery
- Full-time coding Bootcamp (6 months / 40+ hr weeks) hands-on keys
- Restful Web Services, Test Driven Development, Github

*Additional work information available upon request
